16. Md. Samiul Haque (Data Entry Officer,

Prof.M.A.Hai Cancer Registry and Research Center, AMCGH)

with special thanks-

17. Dr. Md. Johirul Islam

[Associate Professor, Department of Cancer Epidemiology,

National Institute of Cancer Research and Hospital (NICRH)]

MESSAGE

Ahsania Mission Cancer and General Hospital is one of the major projects to fight cancer in Bangladesh. Thousands of cancer patients get world-class treatment in this institution. But until date, there had been no organized record of the data of these patients. Cancer registry refers to the systematic collection of information of all these patients, which would provide valuable research tools for those interested in the etiology, prevention, diagnosis and treatment of cancer.

I am very delighted that Professor Dr.M.A.Hai Cancer Registry and Research Centre in Ahsania Mission Cancer & General Hospital is going to launch a book on cancer registry based on data collected from patients visiting outpatient departments of AMCGH in 2021 and 2022.

I am extremely thankful to all those who had given their efforts to make this happen. May Almighty Allah bless us all.

Chairman, Governing Body, AMCGH

Message

Cancer incidence and mortality rate is increasing day by day. Cancer registry is challenging but a part of modern health care that creates awareness globally. Bangladesh needs to give priority to make a smart system for cancer registration to collect proper database of the cancer patients in Bangladesh.

An well-organized cancer registry can be used to prepare a plan of control of the disease. Hospital-based survey is one of the most common ways of data collection and I am very delighted that Ahsania Mission Cancer and General Hospital had taken the step to build the Professor Dr. M.A.Hai Cancer Registry and Research Center. I congratulate the centre for the upcoming publication of their book on cancer registry.

I wish them best of luck.

Professor. Dr. M. A. Hai

Renowned Oncologist, Member Governing Body of AMCGH
& Director, Bangladesh Cancer Society Hospital

Message

Cancer is one of the major causes of morbidity and mortality around the world. It is the second leading cause of death after cardiovascular diseases (CVDs). Incidence of cancer is increasing all over the world. Bangladesh is also experiencing a simultaneous increase in cancer cases with increased detection and advances in cancer care.

The rapid increase in the number of cases, calls for streamlined information and reporting system in cancer for better management. Cancer registration is fundamental for successful implementation of program. It is an essential component of surveillance for cancer prevention and control and is required to a unified, scientific and public health approach. They provide robust epidemiological data for cancer prevention and control, planning and action.

On the basis of that, we had developed Prof. Dr. M. A. Hai Cancer Registry and Research Center, named after the renowned oncologist Prof. Dr. M. A. Hai at level 5 of Ahsania Mission Cancer & General Hospital. Cancer registrars of the cancer registry center had worked continuously on data collected from patients visiting out-patient department of Ahsania Mission Cancer & General Hospital in 2021 and 2022.

All computerized data is compiled into a book, which we are proud to launch now.

I am thankful to all who had given their valuable time and effort behind this great step.

I hope this would open a new era in the development of cancer care in Bangladesh.

Professor Dr. Qamruzzaman Chowdhury

Managing Director &
Senior Consultant, Radiation Oncology
Ahsania Mission Cancer and General Hospital.

Message

Proper database of cancer patients is very important in understanding cancer. Data collection and analysis is the only way to evaluate cancer situation correctly. This process so far had been grossly neglected in government & non-govt. institutions of our country. But now-a-days some medical institutions are coming forward in this regard and undertaking steps to collect proper data. I am indeed very happy to know that Ahsania Mission Cancer & General Hospital has taken such a step and already set up a cancer registry department under the name Prof. Dr. M. A. Hai Cancer Registry and Research Center.

It is also my privilege to write this few words on the occasion of publication of the first cancer registry report of AMCGH and wish its success.
